

Concrete Pontoons & Attenuators

Dunstaffnage, Scotland

Concrete pontoons supplied by Orsta Marine

Gael Force work in partnership with a range of well-established concrete pontoon and attenuator suppliers, whether as a stand-alone installation or to complement the existing SeaHaven and Commercial range of Gael Force products. In either case Gael Force offer a fully managed solution from inception to installation.

Gael Force Engineering specialise in the design, manufacture, management and installation of marine developments to suit the leisure and commercial markets. With our comprehensive range of products, in-house design team and experienced fabrication squad, we can fully manage your project from inception through to installation.

Our services include bespoke product development and mooring design, specification and installation.

Seabreak Pontoons Coming soon

Gael Force SeaBreak pontoons and attenuators: Gael Force Engineering is combining its long established and proven skillset in both pontoon and concrete marine structures to provide an in-house concrete pontoon and attenuator solution. Standard and bespoke products will be available to meet the installation and attenuating requirements.
